PATIENT #: _____
PATIENT NAME: _____
DOB: ____ / ____ / ____ / AGE: ____ / SEX: ____

Your doctor has asked that your symptoms be evaluated with an MRI study with gadolinium intravenous contrast. Gadolinium contrast is given by injection into a vein and helps provide the radiologist with additional information that may not be available without intravenous contrast.

The gadolinium contrast agent you will receive has been approved as safe and effective by the U.S. Food and Drug Administration (FDA). As with any medication, a small chance exists that you may have a reaction to it. Minor and temporary reactions include pain at the injection site, nausea, headache, dizziness, itching, rash or hives. Rarely, a more serious allergic reaction may occur (including facial swelling, difficulty breathing, or low blood pressure) requiring treatment. The odds of an extremely severe reaction, including death, are very rare.

Your chances of a reaction may be increased if you have had a previous allergic reaction to gadolinium, are allergic to other drugs or foods, have asthma, or suffer from kidney disease. Please inform the MR technologist if any of these situations apply to you.

Please answer the questions below.

Please list all allergies: _____
 Yes No - Do you have asthma?
 Yes No - Do you have an allergy to CT (iodinated contrast) or MRI (gadolinium) contrast? (If yes, circle which one)
If yes, when and what happened? _____
 Yes No - Have you ever had an anaphylactic reaction (severe allergic reaction where you had to be hospitalized)?
If yes, when and what happened? _____

FOR WOMEN: Are you breast feeding? Yes No

I attest that the above information is correct to the best of my knowledge. I have read and understand the contents of this form and had the opportunity to ask questions regarding the information on this form. By signing below you agree to gadolinium contrast injection.
